

First, try to be Spiderman. Bend your middle finger down and press your hand on the paper.

Next, trace your hand! Once your done it should look like this. This is the base of your wolf's head.

This is where we start to build up the features of the creature! Put the teeth in to help your mind with placement. Labeled are the ears, eye, nose, and that fur that makes a wolf recognizable.

This is what it looks like after all the details are added to the head. It's really just C's for the ears and eyes, and zig zags for the fur.

And this is the end result! Make it your own and draw what you think a wolf SOUNDS like!
What's the first image that comes to your head?
